PROFESSIONAL SUMMARY

Data Analyst with 2.5+ years at Tata Consultancy Services (BFSI domain), specializing in SQL-driven reporting, ETL pipelines, and regulatory analytics on the TCS BaNCS platform. Delivered 25+ operational and compliance reports, resolved 50+ production data issues within SLA, and maintained 99%+ accuracy across 50K+ policy records. Recognized with three TCS awards — including the Xcelerate Warrior Award and two 2026 recognitions — for performance, compliance, and project excellence.

EXPERIENCE

Data Analyst | Tata Consultancy Services

Oct 2023 – Present

BFSI Domain | TCS BaNCS | SQL · Power BI · Python · ETL · Excel

- Performed EDA on 50K+ policy records, surfacing trends that drove business decisions and improved reporting accuracy across quarterly cycles.
- Developed and maintained 25+ SQL-based operational and regulatory reports, enabling BI and compliance reporting for internal stakeholders.
- Ensured 99%+ data accuracy through rigorous validation, cleansing, and reconciliation workflows across multiple source systems.
- Optimized 15+ production SQL queries — reducing average processing time by 30% — through index tuning, query restructuring, and elimination of redundant joins.
- Resolved 50+ production data issues within SLA, safeguarding downstream reporting and client-facing deliverables.
- Designed and executed end-to-end ETL pipelines supporting data movement across source systems in the BFSI environment.
- Built and maintained Power BI MIS dashboards for KPI tracking, enabling real-time performance monitoring for business leads.
- Automated repetitive reporting tasks using Power Query, significantly reducing manual effort and turnaround time.
- Translated complex business requirements into efficient, reusable SQL reporting logic with minimal rework across stakeholder iterations.

PROJECTS

Customer Shopping Behavior Analysis → [View Project](#)

Solo end-to-end retail analytics project — Python · SQL · Power BI

- Analyzed ~5K customer records end-to-end; cleaned and feature-engineered data down to ~3.9K valid records, creating customer value scores and repeat-purchase flags.
- Built a 6-KPI Power BI dashboard (Total Revenue ~\$256K, Avg Order Value ~\$65, Repeat Rate ~97%), revealing that non-discounted orders drive ~57% of revenue — a strong pricing signal.
- Delivered actionable recommendations for customer retention and margin optimization based on cohort behavior.

Hollywood Movie Analytics Dashboard → [View Project](#)

Performance analytics across genres, seasons, and distributors — Excel · Power BI

- Designed interactive dashboards with KPIs including Total Revenue, Avg Revenue, Blockbuster Count, and Hit Ratio.
- Normalized genre data and engineered revenue categories; derived insights on seasonal impact and top-performing distributors.

IPL Analytics Dashboard → [View Project](#)

Ball-by-ball match analytics across teams, players, and seasons — SQL · Tableau

- Built calculated fields for strike rate, boundaries, wickets, and phase-wise scoring trends; published interactive dashboard on Tableau Public.
- Used SQL for player-, team-, and venue-level analytics, with filters enabling season-by-season performance comparisons.
