

SHIVA KUMAR DEVATHA

Data Analyst | BFSI & Financial Reporting | SQL · PL/SQL · ETL · Power BI
+91 9908080045 • devathashivakumar@gmail.com • Hyderabad, Telangana • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with 2.5+ years of BFSI experience at TCS, delivering monthly financial and MIS reports to a health insurance client through PL/SQL stored procedures and SQL Views. Manages end-to-end data migration pipelines processing 25–30 batches per month across policy and claims production data, resolves production issues within SLA, and maintains 99%+ data accuracy. Independently built two analytics systems — a credit risk model on 225K loan records and an automated stock market ETL pipeline — using Python and Power BI to demonstrate modern BI capabilities.

EXPERIENCE

Data Analyst | Tata Consultancy Services | BFSI (TCS BaNCS) — Health Insurance Client **Oct 2023 – Present**

Financial Reporting & Analysis

- Developed and maintained 25+ monthly MIS and financial reports delivered to the health insurance client, built on PL/SQL stored procedures and SQL Views with Excel as the reporting layer.
- Designed reusable stored procedures and Views on policy and claims production data, standardizing month-end report delivery and reducing build time across quarterly cycles.
- Analyzed 50K+ policy and claims records to validate figures, surface trends, and support financial decision-making for internal and client-facing stakeholders.
- Optimized 15+ production SQL queries — **reducing average processing time by 30%** — through index tuning, query restructuring, and elimination of redundant joins.

Data Migration & ETL

- Managed end-to-end data migration pipelines for the health insurance client — covering data extraction, cleansing, transformation, and loading into production systems.
- Processed **25–30 migration batches per month**, each containing thousands of records, ensuring data integrity and auditability across every batch cycle.
- Enforced data cleaning and validation rules during migration to meet production quality standards and prevent downstream reporting errors.

Production Support & Data Quality

- Resolved 50+ production data issues within 24-hour SLA, diagnosing root causes in policy and claims data to protect downstream reporting and client deliverables.
 - Maintained **99%+ data accuracy** across policy records through structured reconciliation, validation, and cleansing workflows across multiple source systems.
 - Collaborated with business and technical teams to translate reporting requirements into efficient, reusable SQL logic with minimal rework across iterations.
-

PROJECTS

Lending Club Loan Portfolio Analytics — Python · SQL · SQLite · Power BI

- Engineered features across 225K+ loan records using Pandas and NumPy — built default flags, risk tiers, DTI bands, recovery rate, and employment stability metrics from raw data.
- Developed 10 analytical SQL queries covering portfolio KPIs, default rate by grade, state-wise performance, and DTI risk segmentation.
- Built a 3-page interactive Power BI dashboard with 15+ KPIs; surfaced that Grade G loans default at **40.43% vs 3.36% for Grade A — a 12x risk differential** across the portfolio.
- Identified that DTI 30–40 borrowers default at 15.92% — nearly double low-DTI borrowers — supporting debt burden as a primary credit risk predictor.
- GitHub: github.com/shivakumar1507/loan-risk-analysis

Automated Stock Market ETL & Analytics Pipeline — Python · SQL · SQLite · Power BI · ETL

- Built an automated ETL pipeline extracting, transforming, and loading 1,700+ stock records across 7 BFSI stocks from NSE and NYSE into a SQLite star schema.

- Engineered 14 financial indicators including RSI, Moving Averages, Volatility, Cumulative Returns, and Buy/Sell signals using Python and Pandas.
 - Developed 15+ SQL analytics queries and a 3-page Power BI dashboard covering portfolio monitoring, stock deep dives, and India vs USA market comparison.
 - Automated daily pipeline execution with scheduling, logging, and audit tracking for hands-free data refresh.

-

SKILLS

SQL & Databases	PL/SQL, SQL, SQLite
Reporting & BI	Power BI, Power Query, DAX, Excel (Advanced), MIS Reporting
Programming	Python, Pandas, Numpy
Data Engineering	ETL, Data Migration, Data Cleaning, Data Modeling
Productivity	Microsoft Excel, GitHub, Microsoft Office Suite, Databricks (Fundamentals)

CERTIFICATIONS

Databricks Certified Data Analyst Associate
Data Analytics Essentials
Data Science Essentials

Databricks
Cisco Networking Academy
IBM Skills Build

EDUCATION

B.E. in Computer Science Engineering
Balaji Institute of Technology & Science, Warangal, Telangana

2019 – 2023

AWARDS & RECOGNITION

- **Xcelerate Warrior Award** — TCS recognition for performance and learning excellence.
- **Certificate of Appreciation (Mar 2026)** — BFSI PNP HR Team, for timely compliance support to ADC process, aiding FY26 delivery success.
- **On The Spot Award (Apr 2026)** — TCS recognition for excellence in project execution and team contribution.
- **Star of the Month Award (Jul 2026)** — TCS recognition for outstanding performance, ownership, and consistent contribution to BFSI project delivery.
