PROFESSIONAL SUMMARY

Data Analyst with **3 years of experience** in SQL/PL/SQL development, MIS reporting, ETL, data migration and financial analytics within the **BFSI (TCS BaNCS) health insurance** domain. Known for tuning slow queries (~30% faster), resolving production data issues inside SLA, and holding **99%+ data accuracy** across source systems. Recognized with multiple TCS awards for performance and delivery.

Microsoft Certified (PL-300, DP-600) and **Databricks Certified (Data Analyst Associate, Data Engineer Associate & Professional)**, with hands-on experience building Power BI dashboards, ETL pipelines and analytical solutions in Python.

EXPERIENCE

Data Analyst | Tata Consultancy Services | BFSI (TCS BaNCS) — Health Insurance Client **Oct 2023 – Present**

Business Intelligence & Analytics

- Developed and maintained **25+ monthly MIS, operational and analytical reports** using **SQL, PL/SQL and Advanced Excel** for business reporting and financial analysis.
- Designed reusable **PL/SQL stored procedures, SQL views and reporting datasets**, reducing month-end turnaround time.
- Analyzed **50K+ policy and claims records** to identify trends and validate financial data.
- Optimized **15+ complex SQL queries**, improving reporting performance by **~30%** through tuning and restructuring.
- Gathered requirements from business stakeholders and translated them into scalable, SQL-driven reporting solutions.

Data Migration & ETL

- Managed end-to-end **ETL and data migration** — extraction, cleansing, transformation, validation and loading into production systems.
- Processed **25–30 migration batches per month**, maintaining data integrity, auditability and compliance with quality standards.
- Applied cleansing, validation and reconciliation rules during migration to prevent downstream reporting issues.

Data Quality & Production Support

- Resolved **50+ production data issues within a 24-hour SLA** through SQL troubleshooting and root cause analysis.
- Maintained **99%+ data accuracy** through structured reconciliation, validation and quality checks across multiple source systems.
- Built reusable SQL logic with business and technical teams; reviewed teammates' deliverables and resolved SQL/data issues to keep delivery on time.

PROJECTS

Lending Club Loan Portfolio Analytics Dashboard — Python · SQL · SQLite · Power BI

- Engineered features across **225K+ loan records** with Pandas and NumPy: default flags, risk tiers, DTI bands, recovery rates, employment stability.
- Developed **10+ SQL analytical queries** for portfolio KPIs, default trends, grade-wise performance and DTI-based risk segmentation.
- Built a **3-page interactive Power BI dashboard** with **15+ KPIs** and drill-down analysis.
- Found a **40.43% default rate for Grade G vs 3.36% for Grade A** — about **12× higher credit risk**.

Automated Stock Market Analytics Dashboard & ETL Pipeline — Python · SQL · SQLite · Power BI · ETL

- Built an automated ETL pipeline loading **1,700+ records across 7 BFSI stocks (NSE & NYSE)** into a SQLite star schema.
- Engineered **14 financial indicators** (RSI, moving averages, volatility, cumulative returns, buy/sell signals) in Python/Pandas.
- Designed a **3-page Power BI dashboard** with **15+ KPIs** for portfolio monitoring and India vs. USA market comparison.
- Automated daily runs with scheduling, logging and audit tracking for hands-free refresh.
